DIGITAL Enterprise Integration Packages

Leadership Microsoft Windows NT and DIGITAL OpenVMS Integration Software

Leverage the natural affinity of DIGITAL® OpenVMS™ and Microsoft® Windows NT™ by integrating these environments efficiently and cost-effectively with the DIGITAL Enterprise Integration Packages. Easy to buy, install, and maintain, this powerful integration software delivers a fundamental integration infrastructure that's appropriate for all applications and industries—right out of the box.

Packaged integration infrastructure
Client/server computing in an integrated OpenVMS and Windows NT environment offers the "best of both worlds"—the advantages of new Windows NT technology and proven OpenVMS enterprise computing capabilities. Yet selecting and integrating all the right components to bring those two environments together can be a challenge.

Eliminate guesswork
DIGITAL takes the guesswork, risk, and purchasing confusion out of this process. How? By selecting the best OpenVMS and Windows NT integration software from DIGITAL and other industry-leading vendors, integrating that software into two comprehensive packages, testing the components for interoperability, and offering each package at a price lower than the sum of the individual pieces.

This key integration infrastructure is now available in two easy-to-order packages—the DIGITAL Enterprise Integration Server for OpenVMS and the DIGITAL Enterprise Integration Client for Microsoft Windows®. And now, the Enterprise Integration Packages are delivered as part of all OpenVMS AlphaServer Systems.

Easy to install and manage, these comprehensive packages let you connect your Microsoft desktops with business-critical OpenVMS applications and data immediately.
**Benefits**

- Simplifies the selection, purchase, and support of integration software for a mixed OpenVMS and Windows NT environment.
- Delivers out-of-the-box functionality that allows you to immediately connect Windows desktops with mission-critical OpenVMS applications and data.
- Supports both two-tier and three-tier client/server models.
- Provides cost savings over the purchase of individual pieces.
- Costs less to install and manage due to the integration and testing of package components.
- Extends OpenVMS application and enterprise capabilities—including 24x365 accessibility and reliability—to the Windows NT environment.

**DIGITAL Enterprise Integration Server for OpenVMS**

The DIGITAL Enterprise Integration Server for OpenVMS enables OpenVMS to participate in a distributed Microsoft Windows NT environment. Its components include:

- Management Services
- Network Transport and Connectivity Services
- File and Print Services
- Internet Services
- Application Development Services
- Presentation Services

**Management Services**

Developed by DIGITAL and independent software vendors, this suite of tools enables you to manage an entire OpenVMS and Windows NT environment from a Microsoft desktop.

You can use these tools in an integrated environment to make system management easier, simpler to learn, and less time-consuming to perform.

**Management Features:**

- User account management via a Windows-based graphical user interface from a single Windows PC
- Printer management
- Queue management
- Performance management of multiple OpenVMS systems and clusters

**Network Transport and Connectivity Services**

These services supply the software necessary to network OpenVMS and Windows NT systems in a multi-vendor network environment. Industry-leading DIGITAL multi-protocol networking capabilities enable you to run DIGITAL DECnet™ or OSI applications, unchanged, over TCP/IP, and to run TCP/IP applications over TCP/IP—all on a single corporate network backbone.

**File and Print Services**

These services enable OpenVMS systems to support all the file and print sharing that the Microsoft networking environment requires.

Seamless access to OpenVMS server files and printers is provided from either a Microsoft desktop or intermediate server.

**Internet Services**

Internet Services provide a comprehensive portfolio of best-in-class DIGITAL and industry-leading third-party Internet products, plus popular freeware, delivering everything you need to quickly and painlessly transform your OpenVMS system into a Web server.

Extensive freeware, gathered for your convenience, includes client and server software, Web interfaces, conversion and other tools, news readers, viewers, mail clients and servers, and hypertext markup language utilities.

Pre-configured Web pages (HTML files and associated graphics files) are also included in the product suite to help you get started creating your own OpenVMS Web site.

**Application Development Services**

Application Development Services allow you to create high-quality multi-tier client/server applications in C or C++ and deploy them across PC desktops, Windows NT departmental systems, and OpenVMS data servers.

**Components include:**

- Model and process information
- How-to development guide
- Sample application
- Demonstrations of additional DIGITAL and third-party software components.

**Presentation Services**

These services allow you to use X Windows anywhere in your mixed OpenVMS and Windows NT environment. X Windows applications can be combined with Microsoft Windows applications for a rich presentation environment.
DIGITAL Enterprise Integration Client for Microsoft Windows

The DIGITAL Enterprise Integration Client for Microsoft Windows provides your Microsoft desktop environment with rich, cost-effective, and easy access to OpenVMS data and resources via the Enterprise Integration Server. The Integration Client includes:

- Network Transport and Connectivity Services
- Mail Services

Network Transport and Connectivity Services

These services provide both a dependable, multi-protocol infrastructure and connectivity applications to allow Microsoft desktops to fully integrate with OpenVMS systems.

Capabilities include:

- DECnet and utilities for Microsoft operating systems
- Access to X Windows or Motif® applications via a Windows-based X Server
- Access to time-sharing applications via enhanced terminal emulation
- Integrated security for simplified access to multiple network resources
- Ability to print from OpenVMS to printers connected to a Microsoft Windows 95® or Windows NT system, using DECnet or TCP/IP network protocols

Mail Services

Enterprise Integration Mail Services enable you to choose either DIGITAL TeamLinks for Windows, a rich messaging client, or the Microsoft Exchange Client. The DIGITAL MAPI Driver for ALL-IN-1™ lets you integrate Microsoft Exchange Clients with ALL-IN-1 Office Server, without disruption to existing ALL-IN-1 systems, documents, or business processes.

Mail processing on the ALL-IN-1 Office Server allows client users to create, read, forward, reply, re-file, copy, and delete messages, as well as modify and add to a message's address list. Full directory support is provided, including multi-level look-up for X.500, DIGITAL Directory Service, and distribution lists.

Integration ensures that documents of any type from the ALL-IN-1 file cabinet, local file cabinet, or external cabinet can be attached to a mail message. Users can also browse folders in the ALL-IN-1 file cabinet and drag and drop documents from Microsoft Exchange Client.

An added value—evaluation software

Customer evaluation software is included to allow you to test-drive specific software prior to purchase.

A key piece of evaluation software in the Enterprise Integration Server is the ISG™ Navigator which allows access to information on OpenVMS systems from your Windows NT environment.

ISG Navigator, industry-leading OLE DB-based middleware from International Software Group Ltd., accesses Microsoft ActiveX Data Objects through a native interface to make corporate data available to Microsoft and other products that use ActiveX Data Objects.

This capability provides easy access to critical distributed data across the enterprise, whether that data resides on Windows NT or OpenVMS systems. Access is assured across a variety of multivendor databases and file systems.

Some third-party components of the Internet Product Suite, such as the Netscape Communications Server, the Netscape Commerce Server and the Purveyor® Encrypt Webserver for OpenVMS, are offered for customer evaluation through the Enterprise Integration Server Package. This allows you to determine which web server software is best for you, before making a financial commitment. The DATAMETRICS ViewPoint Performance Advisor is also offered for evaluation as part of the Enterprise Integration Server Package.
World-class, worldwide support
The extensive DIGITAL portfolio of service offerings is one of the most comprehensive in the industry. We work closely with our Business Partners to provide you with top-notch assistance throughout the complete software life cycle—from planning and design to implementation and ongoing maintenance.

Licensing
The Enterprise Integration Server package includes two licenses for the Enterprise Integration Client. Additional client licenses are available in groups from 1-1000.

DIGITAL Enterprise Integration Server for OpenVMS
Management Services
DIGITAL OpenVMS Management Tools including:
DIGITAL OpenVMS Management Station
DIGITAL DECamda™
DIGITAL Archive Backup System for OpenVMS Management Tools
DIGITAL Archive Backup Agent for Windows NT
DATAMETRICS™ ViewPoint™ Data Collector
DATAMETRICS ViewPoint Management Console™
eXcursion™

Network Transport Connectivity Services
DIGITAL DECnet-Plus for OpenVMS Alpha End System
DIGITAL TCP/IP Services for OpenVMS Alpha

File and Print Services
DIGITAL PATHWORKS for OpenVMS (LAN Manager)
DIGITAL PrintServer™ Software for OpenVMS
DIGITAL DEcprint™ Supervisor (DCPS) for OpenVMS Alpha, Base
DIGITAL DEcprint Supervisor (DCPS) for OpenVMS Alpha, Plus
DIGITAL DEcprint Supervisor (DCPS) for OpenVMS Alpha, Open

Internet Services
DIGITAL Internet Product Suite

Database Services
ISG Navigator OLE DB Server
ISG Navigator ODBC & OLE DB Client for Microsoft Windows*

Application Development Services
DIGITAL Application Developer Package

Presentation Services
DIGITAL DEcwindows™ Motif for OpenVMS Alpha
Notes: * Denotes Value-added software that is provided for evaluation

DIGITAL Enterprise Integration Client for Microsoft Windows

Network Transport and Connectivity Services
DIGITAL PATHWORKS 32 Client

Mail Services
DIGITAL TeamLinks™ Mail for Windows
DIGITAL MAPI Driver for ALL-IN-1

Hardware and software requirements
DIGITAL OpenVMS VT.1 for Alpha systems
Windows NT 4.0 or Windows 95 with the latest service packs

The Enterprise Integration Package now ships as part of all OpenVMS AlphaServer Systems. The packages can be ordered individually as follows:

Ordering information
DIGITAL Enterprise Integration Server for OpenVMS
QP-5LV A*-AB = DIGITAL Enterprise Integration Server for OpenVMS lic.
QA-5LV A-A8 = DIGITAL Enterprise Integration Server for OpenVMS CD-ROM
QA-05X A-HB = OpenVMS Alpha Layered Products CD-ROM
QT-05X A-C8 = DIGITAL Consolidated Distribution Services

DIGITAL Enterprise Integration Client for Microsoft Windows
QP-5LV A-A# DIGITAL Enterprise Integration Client for Microsoft Windows license

DIGITAL Enterprise Integration License Extension Package
QP-052A* for NAS 200
QA-5LV A-HB Media and Documentation CD-ROM Kit
Notes: *License identifiers, where appropriate, for the Enterprise Integration Server are:
E=Workgroup System, G=Departmental System, Q=Enterprise System

Number License Identifiers, where appropriate for the Enterprise Integration Client are:
B=1 User License, F=100 User Licenses, G=10 User Licenses,
G=250 User Licenses, D=25 User Licenses, H=500 User Licenses,
E=50 User Licenses, J=1000 User Licenses
