- complete source code included!

**Only $39.95**
From Berkeley BSD Unix, FreeBSD is the choice for rock-stable performance on your PC. Join Network providers & power users who rely on FreeBSD.

Slackware Linux ...... pg 36
Tens of thousands of people around the world use Slackware Linux because it’s easy to install and run. With tons of neat software, Slackware is an ideal choice.

Our technical experts packed this CDROM with 1,909 of the world’s best and freshest DOS programs.

An essential disc for organizing, streamlining, and enhancing your Macintosh system.

Now you can make 3-D artwork like the pros! Includes all the scene source, program source, utilities, and tips you need to create vivid artwork.

An exciting collection of fractals created by the world’s best fractal artists. Create your own fractals with the included programs.
Get any Windows program you need – now!

"A real winner... top-of-the-line shareware struts its stuff in an impressive display of elegance and sophistication."

– David A. Wade, CD-ROM Today

CICA™ for Windows is your gateway to the world of Windows shareware. CICA has thousands of programs that span the range of all that Windows offers. Enhance your desktop, have fun and get the most out of Windows.

With the CICA disc you’ll improve Windows with:
- disk, mouse, and keyboard utilities
- screen savers and performance monitors
- updated printer and video drivers
- loan amortization programs
- communication and email
- WWW browser software
- personal information manager programs
- shells, backup and restore programs and diagnostic tools
- 300 Windows NT files.

Personalize your desktop with:
- dozens of bitmaps
- thousands of icons

Enliven your writing with:
- font viewers and editors
- PostScript fonts
- ATM fonts
- TrueType fonts

Be more productive with utilities for:
- Microsoft Excel
- Aldus Pagemaker
- Paradox for Windows
- Word for Windows
- Word Perfect

You’ll also get 200 great games like:
- asteroids
- checkers
- chess
- word games
- card games
- commercial demos

Take a break with one of the games included on CICA!

Our friendly shell makes accessing these files easy.

The CICA disc is a copy of the Center for Innovative Computer Applications (i.e. CICA). CICA is the Internet’s largest MS Windows ftp site, with 1,320 MB of MS Windows programs in 5,120 files.

When programming, you’ll find the programming tools in the CICA collection vital.
- C & C++ code and utilities
- Toolbook programs source
- Turbo Pascal source and info
- Visual Basic source and info
- Paradox source and info
- Excel source and utilities
- Neural Network software
- dll libraries
- api documentation
- help document writing tools

Many programs on the disc include their source code.

As Windows 95 approaches, Windows software development will be rapid. The patches to commercial programs and updates to shareware programs on CICA will help you keep your Windows machine running efficiently. We update this disc quarterly to keep up with the changes.

Whenever you order, you’ll be assured that you are getting the latest in Windows shareware. You can even subscribe to the CICA collection and automatically receive the latest version as we release each disc. You’ll save money and join those who are first to get the latest version of CICA.

Get the most out of Windows. Get your copy of the CICA MS Windows collection. We know you’ll be pleased.

CICA is a trademark of Walnut Creek CDROM.
Enhance your NT workstation with powerful applications!

We carefully sorted the NewT™ collection into 16 categories so you can quickly find what you want. Almost all the binaries are for the Intel platform, with a few for Alpha and Mips. You’ll find:

- programming utilities such as: GNU programs including source code revision control system – rcs, grep, diff, sed, gzip, tar
- GNU emacs 19.17, including source. This is the premier programmer’s editor, bar none
- vi clones, variants on emacs and binary editors
- Perl 4.036, including libraries to update the NT bindery
- 4NT - 4DOS ported to NT. Get the advantages of this enhanced shell under NT
- Hamilton C shell demo (for all platforms) if you prefer the standard Unix shell
- Unix communication programs including finger daemon and telnet daemon. Imagine telnetting to your NT machine!
- SOS NFS server
- newsgroup archives
- SMTP mail agents, NNTP newsreaders, & WAIS search engine toolkit
- an extensive, current driver collection including drivers for video cards, tape drives, scsi adapter, and ethernet cards
- fixes and patches to NT 3.50 and older versions
- games like Nethack 3.1.2, Life
- screen saver modules
- JPEG and GIF image viewers
- POV-Ray ray tracing for NT (see page 29 for full collection)
- ghostscript 2.61 – preview postscript printing on your monitor and print to any printer! (see page 16 for picture)
- Fax Server software.

Teacher 2000 educational programs
The Teacher 2000™ CDROM is crammed full of educational programs. Everyone from toddlers to teachers will love the 2,294 educational applications on this disc. The Teacher 2000 disc includes something for everyone:

• kids: computer and typing tutorials, word processors, introductions to programming, drawing programs; tutors for math, reading, and spelling

• college-bound students: study aids, grade point average calculators, SAT study-help programs, and advice on selecting a college

• teachers: programs to create, print, and administer quizzes; programs to keep track of names, grades, and test scores.

Create beautiful music on your PC!
Do you want to make music? Then you need Music Workshop™. If you’re a beginner, Music Workshop will help bring music to your computer. If you are a professional, you’ll feel at home because a fellow musician produced this disc.

With 450 megabytes of music related programs and professional demos, Music Workshop is an incredible music resource for everyone. The disc features a custom interactive interface that’s a delight to use.

Music Workshop includes:

• MIDI applications: heaps of useful MIDI applications including: sequencers, mappers, MIDI setup utilities, and keyboard librarians

• WAV’s: hundreds of WAV files to spruce up your environment

• converters: programs to convert between WAV, VOC, MOD, etc.

• drivers: drivers for many popular sound cards

• MIDI’s: tons of MIDI files to listen to or study

• miscellanea: various music files including teaching tools for children, label makers for your tape and CDROM collections, chord databases for guitarists, and more

• players: enjoy WAV, MID, and MOD files on your computer.

• utilities: programs to add music to your desktop, musical clocks, editors, and more

You’re sure to find fonts and clip art you’ll use.

Add power and elegance to any letter, document, or design with the 2000 TrueType Fonts™ book and CDROM. This disc gives you 2,000 fonts and 5,000 clip art images in PCX format. You also get a collection of font manipulation shareware and graphics utilities.

The accompanying book makes it easy to choose which font or clip art picture you want. You’ll be amazed at how simple it is to spice up a drab document.

To find a font by name, you may search an index on the CDROM. The program that allows online searching will also copy the fonts to your hard disk. You’ll see each font on the CDROM printed in the book – so you’ll know exactly how the fonts will look in your document. The book also has a section that explains how to use and install your new fonts in MS Windows.

Along with all the fonts, you also get 5,000 black and white PCX clip art images. You can use these images to illustrate any document. We’ve included a handy view program that lets you view the clip art and copy it directly to your hard disk.

We’ve printed every clip art image from the CDROM in the accompanying book. This convenient guide includes sections that are:

- **cute**: cats, dogs, birds, fish, pigs, cows, sheep, and deer
- **beautiful**: works of art, old book plates, and photos
- **decorative**: borders, frames, balloons
- **timely**: holiday images for every occasion
- **useful**: computers, medical, and work-related images
- **important**: symbols and icons for hazards, warnings, and notices

2000 TrueType Fonts has everything you need to design documents that get noticed!

Hand picked fonts let your documents bloom.

Font Garden™ is a comprehensive selection of 500 reliable fonts. All fonts work with both Macintosh and MS Windows. We made sure by running all of them through an imagesetter. You get each font in TrueType and Type 1 PostScript.

Font Garden comes with a full-sized book with each font clearly printed and described. Get this professional font collection today!

You get a collection of beer recipes in an indexed, hypertext format, giving you instant point and click reference to your favorite style. An archive of the Internet beer discussion news groups gives you access to the experiences of hundreds of amateur brewers.

“Anyone interested in homebrewing will definitely find it a must buy, I certainly enjoyed it.” – Eyo Sama, CDROM Mag, May 1995.

Brew your own beer!

The Beer Homebrewing Guide™ is a complete reference and tutorial on brewing beer at home. Whether your favorite is a golden lager, an oatmeal stout, or a hefe-wiezen, this CDROM shows you how to brew it, step-by-step from start to finish.

We include instructions on how to select the right ingredients and tools, as well as the proper techniques and recipes to produce fine quality beers.

If you’re looking for OS/2 tools, you need this disc!

– OS/2 Magazine

The Hobbes™ OS/2 Archived CDROM brings the Internet's largest collection of OS/2 material within your grasp. We constantly update Hobbes (ftp-os2.cdrom.com) so you get the freshest in OS/2 shareware and freeware.

“John C. Dvorak’s Favorite Discs: The best of the best...This company has a crop of neat CD-ROMs – this is but one. I have found lots of nifty utilities, fonts, and other goodies.”
– John Dvorak, PC Computing

This disc contains:

- product updates and patches
  - for OS/2 3.0 Warp
  - for commercial app’s
games such as:
  - chess
  - minesweeper
- graphics programs:
  - 3-D chart and plotting
  - paint programs
- multimedia programs:
  - audio CD music players
  - sound mixers
  - MPEG player
- system utilities:
  - archive utilities
  - calculators
  - CPU usage monitor
- Internet connectivity aids:
  - elm email 2.3 r.14
- GNU and Unix utilities:
  - GCC 2.6.1
  - bash 1.12
  - cvs 1.4
  - fortran to C
  - IRIT 5.0 modeler
  - Perl 4.36 and 5.0
  - TCL 7.3
- System utilities:
  - archive utilities
  - calculators
  - CPU usage monitor
- drivers:
  - sound
  - video
  - printer
- editors:
  - TeX
  - spell checkers
- fonts
  - Emacs 19.27
  - EMX 09a C compiler
- IBM’s latest Corrective Service Diskettes for TCP/IP and OS/2.

Novell Netware OS/2 client.

There much too much more to list.

If you’re interested in source code, you’ll love this disc. The Hobbes collection probably has more source code than any of our shareware CDROM’s – there’s tons of source code here from C++ classes to assembly stubs.

Everything you need to customize your OS/2 workstation!

“For the low price of admission, you can save money if you copy a few of these files from the CDROM rather than paying to download them from a commercial on-line service, or making long-distance calls to OS/2-specific bulletin boards.”

Need to know more about OS/2? Look no further. You get documents about OS/2 programming, system, supported hardware, and user Frequently Asked Questions as well as IBM’s Red Books. Find out what other OS/2 users are doing by reading the Electronic OS/2 magazines and the OS/2 user’s group newsletters.

With 650 megabytes of virus scanned programs and documentation to customize your working environment, you’ll own the most comprehensive selection of shareware and freeware for OS/2.

“There’s megabytes more stuff on the Hobbes CDROM. If you get it, ration yourself I didn’t; I stayed up nights exploring it, and this month’s column is late. Sorry, editor.”
– Chris Bidmead, Personal Computer World.

The premier programmer’s shareware collection!

“If you have ever found yourself digging through BBS file bases for the perfect utility to suit your current problem, this disc is for you.” – QUE's 1995 CD-ROM Buyer's Guide
Stop looking for scientific software!

The Scientific and Technical Library™ CDROM offers the largest selection of scientific and specialist software on the market.

This CDROM is intended for you, the technical and scientific user who does not want to wade through thousands of games, reminder systems, and the like, looking for the scientific software you need.

We packed this disc with virtually all available shareware technical and scientific programs for DOS and Windows. We also included vast amounts of hard-to-find specialist source code and utilities.

Included with the disc is a conveniently indexed book which describes every program on the CDROM in detail. Use the book as a reference tool to track down the application you want or use our view program on the CDROM.

“The view program is extremely easy to use. A novice would quickly be able to navigate through the listings in order to find a specific file.”

– NewMedia Canada

This CDROM includes sections to help you:

- optimize your systems using computer-aided manufacturing and structural analysis
- solve mathematical problems with tools for math and statistics
- program in assembler, basic, C/C++, Cobol, Fortran, Dbase/Clipper, Forth, Logo, and Pascal
- reference resources in chemistry and biology
- develop electrical and engineering models quickly and easily

The normal commercial retailer can’t offer the variety of technical and specialist software which we compiled on this disc. This is a one-of-a-kind collection that you’ll turn to again and again.

Stop looking for scientific software!

The Scientific and Technical Library™ CDROM............$39.95

Do you want to put your mailing list in a database? Do you need a new payroll system? Would you like an easy way to analyze your expenses?

The Business Software Library™ CDROM is a powerful solution to your business needs. This disc contains hundreds of software solutions written by professional people like you for their specific business needs. You’ll find programs covering all aspects of your business – from finance to desktop publishing.

You’ll marvel at the Business Software Library’s ease-of-use. For example: you need to print 2000 mailing labels for your direct mail piece. Simply use the search program to search for “label” and in seconds you’ll have the program you need. You may also use the companion reference book to guide you to every program on the CDROM.

This entire collection costs less than just one commercial bookkeeping, bar coding, or brainstorming program. Many of these programs aren’t available at all in stores.

When you have free time you’ll enjoy hundreds of the hand-picked leisure, home, and hobby programs we’ve included.

Some of the ways you’ll benefit with the Business Software Library:

- gain control of your business finances with accounting, payroll, and bookkeeping software
- manage your time more efficiently with client, contact, and project tracking tools
- create dramatic and convincing presentations with slide, desktop publishing, grammar and spell-checking software
- track investments and real estate with financial and estate planners
- organize your inventory with cataloging and stock management tools

Your most valuable resources are time and money – save both with this CDROM.

Do you want to put your mailing list in a database? Do you need a new payroll system? Would you like an easy way to analyze your expenses?

Font Garden™ is a comprehensive collection of 500 reliable fonts. We tested each font on an imagesetter to make sure every font works. You'll get each font in both TrueType and Type 1 PostScript format. Font Garden comes with a full-sized book with each font clearly displayed and described. Here are just some of the fonts you'll get:

- Ultra Mac Games™ 2 is 1001 games – the largest collection of Macintosh games on CDROM. Ultra Mac Games 2 includes challenging arcade and card games, mysterious text and graphic adventures, creative puzzles and word games.

- Ultra Mac Utilities™ CDROM is 630 MB of the best shareware and freeware utilities for your Macintosh computer. We've carefully selected and organized the files and they're all ready-to-run right off the CDROM.

- Ultra Mac Utilities is the most comprehensive collection of Macintosh tools available. Get your copy today.
You’ll be amazed by these hot animations!

Wow! Awesome Animations™ has 200 files of the latest CAD-rendered animations. Dr. Chip, a twenty-year veteran of computer graphics, is your guide through these wacky and wonderful “fli” sequences. Use them as royalty-free 3-D clip art.

Animations include:
- swimming fish
- bones and muscles
- bomber planes
- morphing lions

Watch these oddly beautiful animations come to life!

Explore the stunning world of fractal art!

“Why do I love fractals? I love the combination of math and beauty. I was never good at freehand drawing though I loved art. Now by using simple math I need no hand-eye coordination to create beautiful images.”

– Bob Carr, fractal artist

Fractal Frenzy™ II is a collection of 2,127 images contributed by eight preeminent fractal artists. 213 of these images are in high resolution GIF format in 1600 x 1200 x 256 colors. The remaining images are at 1024 x 768 resolution in 256 colors. The disc includes Powerview, a fantastic DOS image viewer that animates the color palette of each fractal. Way Cool!

This CDROM contains everything you need to create your own dazzling fractal images. Use the Fractint v. 19 program for MSDOS, MS Windows, and X Window. We’ve included all of the source code and formulas used to create the images on the disc. You’ll learn directly from the masters!

This disc works on PC with 512K or better VGA video or Macintosh with high resolution video.

I’m Chris Bura, the sales manager here at Walnut Creek CDROM. It’s my job to ensure your complete satisfaction with our products.

I want you to be happy with us. If you are ever dissatisfied with any of our discs, please tell me. Simply return the item with a short note describing what is wrong for a full and unconditional refund.

– Chris Bura

How to contact us:

Write to us at:
 Walnut Creek CDROM
4041 Pike Lane Ste D-902
Concord, CA 94520
USA

Shipping charges:
US/Canada/Mexico $5 per order
Overseas $9 per order

Stay up-to-date with a subscription!

Walnut Creek CDROM offers a subscription plan for many of our most popular titles. When you subscribe to a particular disc we’ll send you each new version of the disc automatically.

We’ll bill your credit card when we ship. The normal shipping charge applies. You may cancel at any time – just write, call, or email.

We offer quarterly updates for:

We offer updates about every six months for FreeBSD and Project Gutenberg.

You’ll get the convenience of receiving the latest in quality programs delivered hot off the press. You’ll pocket the savings too, since we sell subscriptions at a reduced price.

CDROM caddies $4.95

Protect your CDROM investment with our best quality caddies. Our caddies fit all standard CDROM drives that use caddies. These highest quality caddies have a lifetime guarantee.

Jewel boxes 10/$5.00

CDs usually come in these clear plastic jewel boxes. Here’s your chance to replace damaged ones inexpensively!

Create your own 3-D images!

Raytrace! the Official POV-Ray CDROM is a compilation of images, scene source, program source, utilities and tips on POV-Ray and 3-D graphics from around the Internet and CompuServe.

This CDROM contains the source for version 2.2 of the copyrighted freeware ray tracer ‘ Persistence Of Vision’ (POV-Ray) as well as binaries for DOS, Macintosh, OS/2, Amiga, Linux, FreeBSD, SGI, and several other platforms.

You get 500 GIF images, 573 JPG images, 80 TGA images and 42 FLI animations.

“The images on the disc, almost without exception, range from the pretty to the downright astonishing.”

The disk is in ISO-9660 and Macintosh format. PC users require at least a 386 coprocessor with 4MB RAM.

To help with generating ray traces, you get a full-color 40 x 40 cm poster/cheat-sheet. One side is a rendered image. The other side is a reference chart to the most commonly used POV-Ray commands.

CDs usually come in these clear plastic jewel boxes. Here’s your chance to replace damaged ones inexpensively!

The image you need right now is royalty free!

The Visions™ Series are superior collections of photos taken by professional photographers. We've color-corrected each image to assure you quality. Each disc comes with about 90 images and includes a 12-page book with each image printed inside. Every image is royalty-free and comes in a variety of formats:

- 1600 x 1145 24 bit TIFF CMYK
- 640 x 480 24 bit JPEG RGB
- 640 x 480 24 bit PICT RGB
- 1024 x 768 8 bit BMP RGB

Visions of Nature............. $ 39.95
Visions of Objects and Closeups.......... $ 39.95
Visions of the Southwest............... $ 39.95

Gifs Galore – 5000 images! $ 39.95

This disc includes photos of everything from animals to Vietnam. (Not royalty-free.)

The GIFs Galore™ CDROM is a collection of 5000 GIF images, most in 640x480 256 color format.

Travel Adventure – 395 great travel photos! $ 39.95

The Travel Adventure™ disc contains a first-rate collection of photos of the US, Ireland, Austria, Germany, and the Caribbean. These images are all royalty-free and come in a variety of sizes and formats: 1024 x 768 24 bit TIFF, 1024 x 768 8 bit GIF, and 640 x 480 8 bit GIF. You also get a 16-page book of all the photos!

Explore the secrets of our vast Universe

"Each category of material on this disc, graphics, software, and text, would probably be enough on its own...The combination of all three adds up to an incredible value that shouldn't be passed up."

— Que’s CD-ROM Buyer’s Guide

The 1,000 image files on the Space and Astronomy™ CDROM will dazzle you. We’ve included images of the earth, the stars, astronauts and spacecraft, 5,000 text files give you detailed accounts of NASA space missions.

This CDROM’s viewer program makes it easy to view images, read documents, and unzip program files.

Fly with the Space Shuttle!

The Space Shuttle Encyclopedia™ is the most comprehensive CDROM about the space shuttle ever produced.

This disc has 3,132 royalty-free images, most in full color. We’ve also included 1,948 text files which cover every shuttle mission.

You’ll enjoy:

- the 747 shuttle ferry
- night images on the launch pad
- 25 sound files
- instrumentation photos

Delve into the history and excitement of the shuttle program, order this CDROM today!
Royalty-free clip art enlivens your work!
The Clip Art Cornucopia™ CDROM contains 5,050 black and white clip art images, totaling 408 MB of files. These clip art images are perfect for any desktop publishing project you can think of!

We’ve stored all the images on this disc in both PCX (PC Paintbrush) and WPG (Word Perfect Graphics) formats for maximum portability. Clip Art Cornucopia contains images in 95 different groups, including:

- animals: insects, horses, dogs, cats, bears, and dinosaurs
- holiday images: Christmas, Thanksgiving, and Valentine’s Day

A fantastic image library – includes reference book!
Highlight your text documents with these high quality pictures. You get 5,342 black and white and 1,030 color images in PCX and TIF formats. The Clip Art Image Library™ CDROM has all the royalty-free pictures you’re looking for!

We’ve indexed and printed every image on the CDROM in the accompanying book. Clip Art Image Library covers dozens of themes, from business to animals. You’ll use it for newsletters, presentations, company and school reports – even spicing up letters to Mom!

Clip Art Image Library includes many full-color images

Fast access to the wealth of the Internet!
“The best reason for owning a CDROM drive I’ve yet encountered.”
– Paul Gilster, The News & Observer

You can sample the tremendous wealth of information available on the Internet with the Internet Info™ CDROM. The Internet is the computer network linking thousands of universities, research labs, and high technology companies all over the world.

“Internet Info disc is a techie’s delight, with more than 12,000 documents, including standards from bodies such as ISO, CCITT, RFC, FYI, IEN, ETF files”
– .net magazine

You’ll find:
- frequently asked question (FAQ) files for hundreds of newsgroups (everything from alt.angst to alt.buddha.short.fat.guy)
- maps of the Internet

The disc provides a small DOS viewer that allows you to look at and search single documents. For finding keywords or phrases regardless of where they reside on the disc, a full-text search program can scan the entire disc in a few minutes.
– Personal Engineering

If computers, networking, and technology interest you, you’ll find the Internet Info CDROM indispensable. If you’d like to know more about the Internet, this CDROM provides an excellent starting point.

The 400 volume classic literature collection

The Project Gutenberg CDROM contains a collection of public domain English language literature and historical documents from the Project Gutenberg at the Illinois Benedictine College.

“Project Gutenberg electronic text is a plan, a vision, if you will, a vision to make information available to all” – QUE 1995 CD-ROM Buyer’s Guide.

This collection represents some of the most commonly used and referenced works of literature. This one disc replaces hundreds of bound volumes on your shelf.

You’ll enjoy:

- classic literature like Alice in Wonderland, Moby Dick, Huckleberry Finn, The Wizard of OZ, The Arabian Nights, and The Heart of Darkness,
- inaugural speeches from Abraham Lincoln, Bill Clinton, and John Kennedy
- historical documents like the Magna Carta, the United States Constitution and Bill of Rights, and the Gettysburg Address
- motion pictures and stills of the Apollo 11 lunar landing
- reference materials including the CIA World Factbook

Each document is in plain-vanilla ASCII, so that everyone using anything from Apples to Z-80s is able to read them.” – Boardwatch.

Simply use your favorite word processor or text editor to open any of the files in this collection.

We update the Project Gutenberg CDROM semi-annually. This version contains all files collected in 1991 through 1995. You can automatically receive all updates to this disc by subscribing.

Own convenient access to a 1000 MB TeX archive

TeX is a professional typesetting system created by Professor Donald Knuth of Stanford University. These CDROMs contain everything that you will need to install and use TeX and LaTeX.

TeX has grown in popularity due to its unique abilities. TeX has strong mathematical and technical document support. TeX can also handle Japanese, Chinese, Cyrillic, and Arabic text.

You get code to compile and install TeX for UNIX, DOS, Macintosh, Windows NT, OS/2, etc. These discs also include fonts packages: (Metafont), foreign language support, documentation, much more!

With East Asian Text Processing™ you can use 313 programs to enable your computer to view, edit, and output text in Japanese, Chinese, Korean, and Vietnamese. You also get vocabulary and word lists, scientific reports, and historical documents.

Explore today’s East Asian computing world with Internet newsgroup articles. This disc contains 35,250 files in 619 MB. You’ll use:

- editors (Mule, Nemacs, Ng, JStevie, Mark Edwards’ MOKE)
- Kana/Kanji input & editing systems (Wnn, kinput, Camma)
- Kana/Kanji interfaces (kterm, exterm, exterm, hanterm)
- word processors (NJStar, JWP)
- fonts (for X and TeX)
- electronic dictionaries (jdic, edict)

With East Asian Text Processing... $39.95
TeX..............................$ 39.95

“The best Linux distribution we’ve come across.”

“Slackware’s setup program made it simple to install.”
~ PC Week, April 1994

The Official Slackware™ Linux is the perfect choice for a low-cost, high performance 32-bit multiuser operating system for Intel 386 and better. Linux, developed by Linus Torvalds and hundreds of volunteer programmers on the Internet, is a clone of the UNIX* operating system.

Slackware Linux turns your machine into a multitasking workstation with a full range of software development, text editing, and image processing tools. You even get the popular "DOOM™" arcade game from id Software™. What’s more, you’ll be able to connect your machine to the Internet and use electronic mail or news (with a supported ethernet card, or with SLIP/PPP using a standard modem).

Patrick Volkerding created Slackware and he also authored this CDROM set. The package includes everything you need to install and run Slackware Linux.

You get complete source code and compilers. The first CDROM contains the easy-to-install Linux system (kernel 1.2.8) and source code.

The second CDROM contains archives from popular Linux ftp sites around the Internet, such as sunsite.unc.edu, and tsx-11.mit.edu.

Linux is a free software product, meaning that you can freely distribute copies of it. You can make installable Slackware floppy disk sets that you can share with your friends using our easy instructions.

Official Slackware Linux requires 4 megabytes of memory (8 is recommended), and at least 12 megabytes of hard disk space to run in a CDROM dependent mode. You don’t need to repartition your hard disk. You can install Slackware on a DOS partition!

For better performance, install Slackware Linux to your hard disk. You can install Slackware using Linux’s own high-speed Linux file system, or by using a LINUX directory on any standard (non-Stacker/DoubleSpace) MS-DOS partition.

Depending on what you install, Linux can use anywhere from 40 to 250 MB. A typical installation with C and C++ development tools, networking with electronic mail and news, the XFree86 X Window System (version 3.1), and several applications needs around 40 MB.

Slackware Linux is compatible with most Intel PC hardware, from PCI/Pentium motherboards to 386.

Unlock the power of your PC with Slackware Linux!
**Q:** What's the difference between FreeBSD and Slackware Linux?

**A:** Slackware Linux is very easy to install. You get a full release of Linux in the form of Slackware 2.3, the Internet's most popular Linux distribution. (By the time you read this, version 3.0 with elf binaries will probably be shipping.) This version also runs from the CDROM – so you don't need to copy all the files.

With Slackware Linux you get carefully selected portions of the ttx-11.mit.edu and sunsite.unc.edu archives – the Internet’s largest ftp sites for Linux tools and add-ons. You’ll own a vast repository of useful Linux add-ons.

“Linux is a UNIX clone written to POSIX spec. Where FreeBSD feels like 4.3-and-a-half, Linux seems like System V Release 4-point-something.” – Bill Pechter, Open Systems Today.

FreeBSD is an entirely different variant of UNIX for the PC. FreeBSD is based on the long-term research efforts of the Computer Science Research Group (CSRG) at U.C. Berkeley. The CSRG has been releasing operating systems technology in the form of their “BSD” releases over the last 10 years. (FreeBSD is now almost POSIX-compliant.)

Commercial operating systems from Digital Equipment Corporation (DEC) and SUN Microsystems had their genesis in BSD. Users of such environments will find FreeBSD familiar. FreeBSD tries to model itself after “commercial” operating systems; where a central group of people release updates in a highly structured manner. Therefore, FreeBSD may be attractive to the more conservative or corporate user.

“I’ve used the 1.02, 1.1, and now the 1.5.1 versions, as well as Linux, and I’ve found they’re at least as stable and reliable as SunOS 4.1.3 and HP-UX 9.” – Bill Pechter, Open Systems Today, September 1994.

“Plenty of source code is included, as is TCP/IP networking over LAN and async connections, telnet, ftp and NFS support.” – Network Computing.

“Wen lange währt, wird endlich gut, mögen auch die Anwender der BSD-Welt gesagt haben, als FreeBSD 2.0 nach einigem Hin und Her endlich verfügbar war. Schlanker im Installationsaufwand, binärkompatibel zu SCO Unix...”

(If you wait a long time, you’ll get something good – FreeBSD 2.0 is slimmer in installation and SCO compatible.) – IX Magazine

Commercial operating systems

Because many parts of FreeBSD have been refined over the last 10 years (such as the networking code), it’s fair to say that FreeBSD is more stable for applications such as Internet firewalls, routers and ftp servers. Walnut Creek CDROM relies almost exclusively on FreeBSD – even using it for our 300 user www/ftp site. (page 54.)

“Mike Newell, – with NASA Science Internet Network Systems ... uses FreeBSD and finds it exceedingly reliable. Great pains are taken to ensure the stability of releases, according to Newell.” – Open Systems Today.

FreeBSDはバージョン2.0になって、メニュー式のインストラクターを導入した。

(FreeBSD has used a menu-system installer since version 2.0.) – Unix User Magazine

However, Slackware Linux is still probably easier to install. Slackware Linux also supports a larger variety of hardware.

“Most system administration tasks were easy because of Slackware's wealth of documentation and its forgiving OS.” – InfoWorld, 8/95.

In both cases you’re getting a complete development environment, C compilers, editors, all the GNU tools, and a wide variety of other system software. Both systems include XFrees86 X Window System, the number one choice in windowing systems. (X Window is what most commercial vendors bundle with their systems.) Both products offer basic SLIP, PPP and TCP/IP support, and both are unbeatable values.

Never has the PC user had such a rich selection of high quality operating systems available as free software. Whether you pick Slackware Linux or FreeBSD, you’ll be highly pleased. We unconditionally guarantee it!

FreeBSD 2.0.5 is a full 4.4 BSD Lite-based 32-bit operating system. This product includes software developed by the University of California, Berkeley and its contributors.

FreeBSD has a simple CDROM installation. You can easily switch between operating systems with a simple to set-up Multi-OS boot system.

FreeBSD comes with XFree86 3.11 (X11R6) with support for VGA/SVGA, TSENG ET3000/ET4000, S3 801/805/928/864/964, P9000 series, AGX, ATI Ultra/Ultra Pro, W32 and IBM 8514 accelerated graphics cards.

You also get ready-to-run X11 utilities such as XView, XV, Tc/Tk, JPEG, etc.

FreeBSD comes with full USENET News and mail (erpm, trn, elm, mh) software. You get Berkeley-style (TCP/IP) networking services (ftp, telnet, rlogin). Industry standard NFS and NIS services plus SLB & PPP support make connecting to the Internet a breeze! You’ll also get extra Internet services like archiver, gopher, chirema ftp, and WAIS.

FreeBSD includes a complete development environment with GNU C and C++ compilers (+v.2.6.3), f2c (Fortran to C), source debuggers, GNU Emacs 19.28, profilers, etc. For printing you get TeX 3.14, ghostscript, Hyla fax software, and AFM font descriptions. The bash, csh and tcsh shells give you a rich choice of operating environments.

FreeBSD 2.0.5 incorporates a number of advanced 4.4 BSD features (portals, “union” file systems, etc.) plus dynamically loadable filesystems, compressed binaries, diskless (network) booting, a kernel management interface, dynamic device configuration, full SCO® binary and FreeBSD 1.X compatibility.

The complete system comes with source code. With FreeBSD you get a tightly integrated build system that lets you recompile the entire source tree with one command. FreeBSD has ISO 9660 and Rock Ridge CDROM support. The discs are in Rock Ridge format.

Turn your PC into a UNIX workstation with FreeBSD

“At win.net we are a subscription uucp service. We have around 3000 uucp feeds of mail and newsgroups hanging off of a P90/FreeBSD box. FreeBSD handles the heavy load quite well and it’s nothing short of amazing. Salutations to the FreeBSD team.” (also see page 54.)

- Mark Hittinger, bugs@win.net

FreeBSD puts the power of a workstation in your PC!
Upgrade your X11 to the last official release!

The X11R6™ CDROM two disc set contains the OFFICIAL X Consortium release of the X Window System, X11R6 patch level 12. It also contains the full XFree86 3.1.2 distribution for Intel (PC) platforms from the XFree86 Project, Inc.

Both distributions come with full source code and, for your convenience, precompiled ready-to-run binaries for the following platforms and architectures:

Workstations:
- HPUX 9.05 (PA-RISC)
- OSF 3.0 (ALPHA)
- Solaris 2.4 (SPARC)
- SunOS 4.1.3 (SPARC)
- ULTRIX 4.4 (MIPS)
- IRIX 5.2 (MIPS)

Intel (386/486/Pentium) PC class:
- Linux (a.out and ELF)
- BSD/OS
- FreeBSD 1.1.5 and 2.0.5
- NetBSD
- ISC
- SVR4
- SCO

You also get the original, fully-packed versions of X11R6 and XFree86 3.1.2.

It is also possible to compile a complete distribution of your own on any of the following platforms:
- A/UX 3.0.1
- AIX 3.2.5
- Microsoft Windows NT 3.1
- NCR UNIX SVR4
- NEWS-OS 6.0
- UNICOS 8.0
- SYSV/860

Many UNIX platforms not listed here will work with only a few changes. You can compile the X11R6 sources directly from the CDROM with the included tools. These distributions unpack into /usr/X11R6, and thus will not interfere with any older distributions of X11 you have on your system.

As a bonus we’ve included the Internet-contributed X11 software such as window managers, utilities, and experimental enhancements.

Use Berkeley 4.4BSD as a reference for your hacking

4.4BSD-Lite™ is source code ONLY. If you love to read good code and tinker with your system, this is the disc for you.

This CDROM contains software developed by the University of California Berkeley, and its contributors. This CDROM includes source code and manual pages for the C library, about 95% of the utilities distributed in 4.4BSD, and all but a few files from the kernel. The system is almost entirely ANSI C, IEEE POSIX 1003.1, and 1003.2 standards compliant.

The 4.4BSD-Lite distribution adds support for several new architectures, including: SPARC stations 1 and 2, MIPS-based DEC station 3100, 5000, and Sony NEWS, 68000-based HP 9000/300 and Omron Luna, and 386-based PC’s. Both the HP300 and SPARC ports can run native operating system binaries via emulation.

Note: It is not possible to compile or run 4.4BSD-Lite without a pre-existing system that is already installed and running. 4.4BSD-Lite does not contain program binaries for any architecture.

Major new facilities include:
- a new virtual memory implementation derived from the MACH operating system developed at Carnegie Mellon
- a new virtual file system interface supporting file system caching
- a freely redistributable version of NFS
- a new log-structured file system that provides near disk-speed output and fast crash recovery
- the conversion to the IEEE Std 1003.1 (“POSIX”) facilities. The new terminal driver is similar to the System V driver with extensions to get the functionality previously available in the 4.3 BSD terminal driver
- a new “make” allows simplified makefiles for the system software and allows compilation for multiple architectures from the same source tree

4.4BSD Lite.................. $ 39.95

X11R6............................. $ 39.95
The tools you need to get the most out of UNIX

This new release of the GNU software archives from prep.ai.mit.edu contains over 230 programs for your UNIX computer. Not only do you get over 250 MB of source code, but you also get precompiled binaries for both SunOS 4.1.4 and Solaris 2.3. These binaries are fully functional on Solaris 2.4 systems.

The GNU utilities pride themselves on being portable, thus you will encounter them wherever you go in today’s computing world. Because the GNU utilities come with source code, people have ported them to almost every environment, from the PC to the supercomputers. Once familiar with these tools, you will be able to operate in almost any UNIX environment.

With this disc you get a full complement of development tools including the world’s best text editor, Emacs, a production C and C++ compiler, GCC, and a host of other tools. The industry standard Emacs text editor (v. 19.29 and 18.59) will increase your programming speed with its knowledge of different programming languages. Emacs is written by programmers for programmers.

For the C developer, we include the GCC C and C++ compiler (v.2.7.0), the C++ library (v. 2.7.0a), the debugging tool GDB (v. 4.14) and many other compilation tools. Some of these other tools include: GAS, the GNU Assembler (v. 2.5.2), and the GNU linker (v. 2.5.2).

You’ll also get other languages including Perl 5.001, fast becoming the industry standard scripting language, and smalltalk (v. 1.1.1).

GNU has some recreational programs, including GNU chess (v. 4.0p174), GNU go, and GNU Shogi (v. 1.2p03).

All of these packages come complete with full source code, installation and compilation instructions, and user documentation. In addition to the full releases, the larger packages have patches you can apply to an existing distribution to bring it up to the current release – and keep the customizations you’ve made!

A wealth of Quad-FAT applications for NEXTSTEP!

The third edition of the popular Nebula™ for NEXTSTEP CDROM is here! This new version is now Quad-FAT and takes advantage of the multi-architecture binary technology that NeXT offers.

The applications on this CDROM run on the original NeXT “Black” hardware, Intel, Hewlett Packard SPARC and Sun SPARC computers running NEXTSTEP. You’ll enjoy:

- 262 NEXTSTEP-ready fonts
- financial, educational, utility, and mail programs
- 80 exciting games

Most applications come complete with source code and are ready-to-run directly from the CDROM. The Nebula CDROM increases your productivity without using a single meg of hard disk space!

Upgrade your System V workstation

The Sys Vr4™ CDROM contains 660 MB of free software in source and binary form for owners of Intel-based versions of UNIX System V 4.2 (i.e. UNIXWare™).

LEMS packaged all the binaries in the standard pkgadd format, over 170 packages which you can install directly from the UNIX desktop with no special tools. You’ll get:

- GCC 2.5.8
- gdb 4.11
- C++ library 2.5.3
- Emacs 19.23
- mail and Internet access software
- text processors: TeX 3.14, groff 1.09, and ghostscript 2.6.1
- X-based games and applications

All programs can also be executed directly from the CDROM to save valuable disk space.
Have you had a project where you know the solution is possible but you don’t know how to do it? Do you dread testing one dead-end approach after another? What if you had a vast collection of code that you could easily search. You could find examples of how other people solved the coding problems you face. The code collection you need is the **Source Code™ CDROM**.

I was trying to write a program that quickly deleted numerous files under MSDOS. While MSDOS does it quickly, the C library function findfirst(), findnext() is pretty slow. I looked at the MSDOS collection on this disc and found ten examples of how to delete files under DOS. Nine of them used variants of the findfirst(), findnext() routine. One of them used a weird BIOS call that accomplished exactly what DOS does when it deletes files quickly. I would never have thought of this solution on my own.

The Source Code CDROM gives you an enormous source code collection to reference. You get high quality code from the USENET source archives, the Simtel UNIX-C Archive, and MSDOS source code. This is 600MB of source in 15,000 files. An index file in each subdirectory briefly describes each file, making it easy to locate files by name or subject. Our view program lets you search through the index files similar to ‘grep’ under unix or ‘find’ under DOS.

The USENET archives contain 390MB – nearly 11,000 files. Included are: the alt.sources archive and the comp.sources archives for Amiga, Apple2, Atari-ST, games, Mac reviewed, Sun, and UNIX. Most of the code is in C.

The Simtel UNIX-C Archive contains 130 MB of C source code in 1050 files. Most of these files are complete working programs. The MSDOS directory contains 73MB, 1900 compressed (mostly zipped) source code packages. The MSDOS sources are mostly C, but also contain Turbo Pascal, BASIC, Turbo Basic, Assembly, etc.

This disc is a perfect addition to any programmer’s library. Order your unconditionally guaranteed Source Code CDROM today.
The C Users Group Library™ CDROM gives you the entire C Users Group Library through Volume 430, a collection of more than a hundred MB of user supported C source code. Most of the source code is for MSDOS with several recent volumes for UNIX.

Source code reuse is the key to software productivity. This disc provides you with thousands of files that you can read, analyze, and incorporate into your own programs. You'll find:

- function libraries, including text display and editing
- genetic programming routines
- compilers
- text formatters
- BBS's
- games including chess
- math packages
- cross compilers
- text editors, including ‘vi’
- communication support
- interpreters
- co-routines
- tutorials
- linkers
- X-Window molecular structure visualization
- hard disk partition table and IDE controller examination
- uucp news reading software
- ghostscript 2.6.1 for MSDOS and MS Windows
- much more!

This CDROM also contains all the source code listings originally published in The C Users Journal.

With our handy DOS view program, you’ll find the files you need in seconds. To make it easier to find the example you are looking for, the disc incorporates our full word lookup program.

We’ve stored the text files on the disc with useful information in a database, so you can search for any keyword on the disc in a matter of seconds. You get search engines that run under MSDOS, SunOS, Solaris, FreeBSD and Linux.

The C Users Group Library is an essential addition to your programming toolkit.

We last updated this disc in September, 1995.

Own every Ada resource you could possibly need!

The Ada CDROM is a copy of the Internet’s Public Ada Library (PAL). With 1.3 GB of compilers, documentation, information, and source code, this two-disc set is a valuable resource for any serious Ada programmer. Over 1,000 files added or updated since the July 1995 edition. Included you’ll find:

- Plug-and-Play section for DOS users, including a complete Ada83 and Ada95 software development environment that automatically installs directly from the CDROM
- AdaCAPS (Ada Computer-Aided Programming System) which gives the DOS-based GNAT user a second integrated development environment
- HOW2USE directory that presents information on how to use this CDROM on different platforms, such as DOS, Mac, UNIX, etc.
- GNAT 2.06, the GNU NYU Ada95 Translator sponsored by the FreeSoftware Foundation and DoD’s Ada Joint Program Office. Ready-to-run ports of GNAT for DOS, Solaris, SunOS, Linux, HP, OS/2, Windows NT, Silicon Graphics, and others
- AVL Ada95 editor/debugger/interpreter – an integrated Ada95 development environment
- Ada83 to Ada95 Compatibility Guide, which highlights the differences between Ada83 and Ada95
- Ada95 Transition Guide, a document for managers who are considering moving from Ada83 to Ada95
- GWU Ada/Ed, NYU Ada/Ed, and SmallAda Ada83 compilers, with ready-to-run binaries for DOS and Mac and source code
- 200MB of Ada95 and 60MB of Ada83 information – the Ada95 6.0 reference manual and rationale, and the updated Lovelace Ada95 tutorial, both in hypertext
- software for Ada compiler evaluation and benchmarks.

The Perl CDROM contains everything we could find related to Larry Wall’s Perl language. Perl combines the best features of C, sed, awk, and sh. People familiar with one or more of these languages should have little difficulty programming in Perl.

Perl is an interpreted language optimized for scanning text files, extracting information, and printing reports based on that information. Perl is also an excellent language for many system management tasks.

With this CDROM, you get mirrors of over a dozen Perl archives, including those at the University of Florida and Texas Metronet. The material is up-to-date, uncompressed, and reorganized to make finding the files you want easy.

You’ll get the sources to the latest versions of both Perl4 (4.036) and Perl5 (5.000).

Perl................. $ 39.95

The hot new system admin programming language

Perl compiles on over 40 platforms! This CDROM includes hundreds of Perl programs in the scripts directory, including: system administration utilities, mail handling, USENET news, Internet browsing, file handling, text processing, and new libraries and modules.

The Perl CDROM comes with unformatted and formatted versions of the documentation, tutorial slides, papers, examples, and support utilities (undump and wafe). We’ve also included articles on a variety of subjects and discussions of the new features of Perl5.

You also get source or binary versions for:
- Amiga
- Atari
- A/UX
- LynxOS
- Macintosh
- MPE
- MSDOS
- MVS
- NetWare
- Windows-NT
- OS/2
- VMS
- Xenix

The Turbo User Group CDROM is a collection of source code, utilities, and shareware exclusively chosen for the members of the Turbo User Group (TUG).

This TUG collection is full of great code and utilities for Borland’s Turbo series of compilers (C, C++, and Pascal). You’ll get:
- 1,800 C and C++ files
- 2,200 Pascal files
- 714 MS Windows files
- source listings from PC Techniques magazine

Our handy view program makes navigating these files a breeze! We’ve included all of the TUG’s newsletters – a great source of programming tips. We guarantee that this CDROM will make you a better programmer!

Super reference code for Turbo C and Turbo Pascal

The Clipper CDROM contains 2,543 of Clipper utilities and source code files to help you work smarter and faster!

Among the programs and source code you’ll find:
- upgrades and patches for Clipper 5.2 and 5.3
- conversion routines for DBF and ASCII files
- archives, documents, and newsletters from Clipper conferences
- tutorials for general Clipper procedures and how to use FDILIB

We made this disc easy to use, so you’ll spend less time looking for files and more time writing code!

Do you want to use Clipper more efficiently?

The **Avalon** CDROM is the ideal collection for graphic programmers and artists who want resources for 3-D artwork. You get:

- demos: Real3D, Caligari’s TrueSpace, Vector Reality version 1.1 and 1.2, and Real Light 2.1
- hundreds of texture images and 3-D objects
- programmer’s guides to object formats
- source code and tools for 3-D wireframe graphics
- software and tarballs of 3-D research

Avalon is a compilation of the popular 3-D internet archive at ftp.cdrom.com, formerly at chinalake.navy.mil.

**Check out these other products!**

**The GEMini Atari CDROM** contains 631 MB of quality public domain programs, shareware, and commercial demos for Atari computers. This disc is BBS ready.

**GEMini Atari** $39.95

**The Sprite CDROM** is only for fearless operating system adventurers!

This disc contains Sun SPARC executables, full source code (GNU and X11), and all research papers from the Sprite project at Berkeley.

**Sprite** $39.95

**The X11R5/GNU** disc has the source for the X11R5 Window System, the X11 contributed software, and the entire Free Software Foundation GNU source code.

Along with the source code, you get SPARC binaries and libraries for the GNU programs and the X11R5 server clients.

**X11R5/GNU** $39.95

**The Linux Bible** is a 1,500 page book that answers any question you have about Linux. The book includes sections on: Linux installation, developing firewalls, and SCSI programming.

**The Linux Bible** $39.95

**Math Solutions** $39.95

**Avalon** $39.95

**With the **Math Solutions** CDROM, you’ll get thousands of mathematics programs, subroutines, source code samples and text files for MSDOS, MS Windows and Macintosh.

This disc has 85 megabytes in 547 files for MSDOS, 10 megabytes in 45 files for MS Windows and 44 megabytes for Macintosh.

- K-12 (Pre-Calculus)
- college algebra and calculus
- ordinary differential equations
- partial differential equations
- probability & statistics programs
- complex variables
- discrete mathematics
- linear and matrix algebra
- dynamics and modeling
- numerical analysis
- spreadsheet programs and files

Choose among desktop calculators:

- deg/rad for trig, temps in C/F
- “Infinite” precision calculator
- graphical scientific calculator
- 1-D compressible flow functions

**Math Solutions** $39.95

**Other Products**
Out of the box, the UNIX system is free to use and comes with a variety of pre-installed applications. To set up a custom environment, you can choose from a wide selection of software packages, such as text editors, programming languages, and tools for system administration. These packages are available for download from our online catalog, making it easy for you to select the ones that best suit your needs.

For more information, visit our website at http://www.cdrom.com. Here you can:
- learn about the CDROM's we sell
- access our job listings
- access our anonymous ftp site at ftp.cdrom.com.

Our FreeBSD web page

The best way to access the net is via the “World Wide Web.” The address of our site is http://www.cdrom.com. On our web pages you can:
- check out what’s new
- learn all you need to know about the CDROM’s we sell
- purchase CDROM's
- check out our job listings
- access our anonymous ftp site at ftp.cdrom.com. We have 52 Gigabytes of stuff up for downloading, including most of these CDROM titles. You can try out the titles you’re interested in before buying them.

Access this popular site via your Web browser from the online catalog pages. If you like what you see, purchase CDROMs without leaving your browser!
